# What is HECIS?

HECIS is a community based not-for-profit educational and support service to children and their families. HECIS utilises a transdisciplinary key worker model to support inclusion and participation in mainstream and community settings.

We offer:

- Special education services including screening of speech and language skills, preacademic/cognitive skills, fine and gross motor skills, social and behavioural development.
- Professional support for your child in their educational setting
- HECIS teachers are experts in incorporating speech, physio, OT and behavioural goals into your child's individual program within their educational setting
- HECIS Special Education Teachers are experts in working with your child's teachers in their mainstream setting; offering suggestions for individualised programs and teaching strategies

## HECIS provides support under the NDIS

**We support the introduction of the NDIS, giving our families greater choice and a bigger voice in their choices.**

HECIS will be registered to provide supports to NDIS participants.

We will continue to provide Early Intervention services for children 0-8 years as we transition into the NDIS scheme.

Families are encouraged to use HECIS for specialised individual therapy for early childhood under the NDIS.
